

## **Build and Drive Strategy while Contributing to Global Food Security for the World Leader in Potato Research**

The International Potato Center (CIP) is seeking a dynamic and experienced research leader to head its Global Potato Agri-Food Systems Research and Development Program across Africa, Asia and Latin America. The incumbent will lead an innovative portfolio of high impact research and development projects designed to increase the contributions of potato to sustainable intensification and diversification of agri-food systems, contribute to food security, nutrition and rural economic growth in priority countries and contribute to the Sustainable Development Goals of the United Nations.

CIP (headquartered in Lima, Peru) leads in research and development for potato and sweetpotato with a strong track-record in Africa, Asia, and Latin America. In particular, CIP scientists are recent World Food Prize Winners following in the footsteps of Nobel Peace Prize winner Dr. Norman Borlaug; CIP has also been awarded the AI-Sumait Award in 2016 for their groundbreaking work on the Orange Flesh Sweet Potato in Africa. As a member of the CGIAR Consortium, a global network of 15 international research centers supported by more than 50 donors across the globe, CIP is fully dedicated to achieving food security, improved nutrition and well-being, and gender equality for poor people in the developing world.

### **Global Program Leader – Potato Agri-Food Systems**

This position will provide overall direction and momentum for CIP's potato research and development program leading a multi-disciplinary team of scientists in global locations in Africa, Asia, and Latin America. CIP emphasizes the broader agri-food system context of its crop research, addressing critical challenges of sustainable intensification, climate resilience, scalability of innovations, gender, value chains and inclusive economic growth.

The Program Leader will expand the current portfolio through new initiatives engaging CIP scientists in all related disciplines, linkages with related CGIAR research programs, and key research and development partners globally. He or she will create and shape the strategy for the global Potato Research Program to help drive technologies that will benefit farmers, researchers, extension workers, development stakeholders and markets.

The Program Leader will report to the Deputy Director General of Research and Development. The preferred location for this role would be CIP's offices in Nairobi, Kenya with frequent international travel (40-50%) in Africa, Asia and Latin America. This truly represents an opportunity to make a huge impact on the world, as the potato is a key crop for small farmers and communities in developing countries all over the globe.

### **Job Responsibilities**

#### ***Strategic research for development***

- Provide strategic direction for the potato program, setting priorities that respond to changing country, regional and global demands and which contribute to long-term CIP and CGIAR strategic objectives and goals.

**CTI Executive Search | 500 Foothills South Drive, Suite 2 | Sedona, AZ 86336 USA |  
928.282.5366**

- Provide science leadership, ensuring innovation and scientific excellence in all research and development projects through supervision and mentoring of scientists and through his or her own contributions as an innovative researcher.
- Strengthen the capacity and performance of CIP's research teams in Africa, Asia and Latin America to continuously innovate and deliver on program commitments at consistently high standards of excellence.

***Program development and management***

- Lead resource mobilization in support of strategic program priorities working closely with CIP global and regional teams.
- Promote collaboration between scientists and researchers across biophysical and social science disciplines and between regions in support of program priorities.
- Attract researchers, students, and visiting scholars to the program, providing opportunities for research collaboration and advanced training linking national and international agricultural research institutions.
- Establish and strengthen strategic partnerships with research institutions, development agencies, and private sector partners to accelerate progress and increase CIP scale of impacts.
- As a member of the Science Leadership Team, contribute to implementing CIP's Strategic and Corporate Plan, and specifically develop and implement a rolling business plan for the program.
- Ensure effective management of projects and financial resources related to the program.

**Job Qualifications:**

- PhD in an agriculture related field with 10+ years of experience post-PhD; recognized achievements and strong publication/grant record, and demonstrated success in agricultural research.
- Highly collaborative with managerial experience in leading a set of diverse teams, scientists, and direct reports (10+) across numerous countries including Asia, Latin America, or Africa.
- Experience with strategic development and implementation in potato-related or other vegetatively propagated crop research programs in developed and developing countries is highly preferred.
- Excellent leadership skills to promote effective collaboration within the global team and cross partner organizations.
- Demonstrated experience in resource mobilization for attracting and securing research funding.
- Strong record leading concrete projects, delivering results, and development of new technologies.
- Strong written and oral communication skills in English; Spanish, French or other language skills would be considered a plus.
